

VIBRATION ALERT ALARM

Shock Sensor Alarm For Windows

Product Code: EL00160

Introduction

The Essentials Vibration Alert Alarm is a convenient, easy to use alarm designed to increase the safety of your home, outbuilding, garage or shed. When used on windows the alarm is intended to provide both a visible deterrent by the use of an adhesive warning sticker and an audible deterrent should there be an attempted forced entry.

Operation of the alarm

1. Using the double sided adhesive sticker mount the Essentials Vibration Alert Alarm on the glass of the window, or door or surface to be protected. Ensure the surface is clean, dry and flat.
2. To arm the unit, position the switch located at the side of the unit to 'On'.
3. Once set, the siren will be activated if there is an attempted break-in or if the glass or door is hit or knocked.
4. The loud siren will sound 30 seconds and will then automatically reset after 3-5 seconds.
5. To test, gently knock close to the alarm in several places. The Essentials Vibration Alert Alarm will sound.

Note:

When testing a cloth can be used to cover the alarm siren to reduce the risk of hearing damage.

Battery test and replacement

It is recommended that the alarm is tested regularly. If the alarm sounds weak, the batteries should be replaced. The unit operates by 3 x LR44 batteries. To replace the batteries, slide off the battery compartment cover (located at the front of the unit). Insert 3 x LR44 batteries, noting the correct polarity inside the battery compartment. Replace the battery compartment cover.

Remove batteries before storing this device for extended periods. Batteries will corrode over time and may cause permanent damage. Depleted batteries should be disposed of properly.

WARNING

The high output siren fitted to this alarm may cause ear damage if used at close range for a prolonged period of time. Keep away from children and pets ears. This product is designed for use as a deterrent; it does not guarantee protection or personal safety.

CAUTION

- When testing the alarm, make sure you cover the siren.
- The power source has a finite / limited life.
- DO NOT MODIFY THE ALARM.
- The alarm should be kept out of reach and audible range of children and pets.

Note:

Performance may be adversely affected following prolonged exposure to extreme temperatures.
