

MINI ALL PURPOSE

Multi-Function Mini Alarm

Product Code: AL00033

Introduction

The Defender Mini All Purpose Alarm is a multi-functioning device in a miniature casing. It can be carried in hand, attached to a bag or clipped to a belt. The alarm produces a high output siren and has the added benefit of an independent ultra bright white LED torch.

Note:

The Defender Mini All Purpose is designed to detach itself from the key ring attachment once activated to ensure the user does not need to leave their keys at the scene of the incident.

Operation of the alarm

As a Handbag Alarm

Attach the alarm to your bag using the key ring attachment so that the alarm will remain attached to your bag after activation. The ripcord should be held in your hand or attached to your clothing so that when your bag is pulled away from you the pin will be released, thus activating the siren.

As a Personal Alarm

Ensure the alarm is held or attached to your clothing/bag using the belt clip. To activate the alarm, pull the ripcord. To stop the siren, replace the rip-cord.

Test button

Use the test button regularly to test the remaining battery strength. Do not use as an alternative in case of emergency. If you feel unsafe in any circumstance, activate your alarm. To activate the test function, press and hold the smallest yellow button located on the front of the alarm.

Battery replacement

It is recommended that the alarm is tested regularly. If the alarm sounds weak, the batteries should be replaced. To replace the batteries, remove the two screws from the back cover and replace the batteries noting the correct polarity. This unit operates by 3 x LR44 (or AG13).

WARNING

The high output siren fitted to this quality personal alarm may cause ear damage if used at close range for a prolonged period of time. Keep away from children and pets ears. This product is designed for use as a deterrent; it does not guarantee protection or personal safety.

CAUTION

- When testing the alarm, make sure you hold it at least at arm's length away from your ear.
- The power source or propellant has a finite / limited life.
- DO NOT MODIFY THE ALARM.
- The alarm should be kept out of reach and audible range of children and pets.

Note:

Performance may be adversely affected following prolonged exposure to extreme temperatures.

Personal Safety Alarm Guidance

It is advised that use of an audible personal alarm should not be relied on as the sole means of preventing an attack and should be used in conjunction with other precautionary measures.

Please note the following advice:

General use

- Always have the alarm close to hand and ready for use.
- Plan your route / journey in advance.
- Tell someone where you are going and what time you will be back.
- Walk with confidence.
- Be alert.

When in your car

- Always have the alarm close to hand and ready for use.
- Always park in well lit areas.
- Have the keys ready as you approach your car.
- If another vehicle (including the police) is signalling you to stop, do not pull over in an isolated spot, wait until you reach a safe area.
- Be alert at all times.

Before you use your alarm

- Be sure you know how to activate and de-activate the alarm.
- Make regular checks on power and at the first indication of a weak sound, replace the battery.
- Practice appropriate means of carrying the alarm ready for use.

Remember

Personal safety alarms are designed for use by individuals who are under threat from attack and should be used with care and responsibility. It is intended to shock and disorientate an attacker to provide a distraction so that the user can make an escape.

It is not intended to be used as a distress signal for attracting help and attention. However the noise may induce fear of intervention and detection of others so this is an opportune secondary function.

DON'T FORGET AN AUDIBLE PERSONAL ALARM SHOULD NOT BE EXPECTED TO PROVIDE A COMPLETE SAFEGUARD AGAINST ASSAULT AND USERS SHOULD ALWAYS TAKE SUITABLE PRECAUTIONS TO REDUCE THE RISK OF ATTACK.
