NUMBER PLATE SECURITY KIT

Safety For Vehicle Registration Plates

Product Code: OT00570

Introduction

Vehicle registration plates are at risk from being stolen and used for criminal purposes. The fixings supplied in the kit are "anti-tamper" one way security screws, a straight replacement for your existing registration plate screws.

Includes

Anti-Tamper Screws:

- 20 x 5.7mm
- 19 x 4.5mm
- 19 x 4mm
- 19 x 3.5mm
- 12 x 5mm

Security Caps:

- 4 x Black
- 2 x White
- 2 x Yellow

Instructions

1. Remove the existing screws from your registration plate.
2. Select the correct colour security cap.
3. Select the correct size anti-tamper screw.
4. Insert the anti-tamper screw into the security cap.
5. Hold the registration plate aligning the hole in the chassis with the hole in the registration plate.
6. Insert the anti-tamper screw into the hole and secure tightly.
7. Using a standard flathead screwdriver tighten and anti-tamper screw.

These screws are specifically designed so they cannot be removed with a regular screwdriver, you may need to seek professional assistance if you need to remove the registration plate.
