

AUTOMATIC LED NIGHT SAFETY LIGHT

Automatic Dusk till Dawn Sensor

Product Code: OT01136

Introduction

The Automatic LED Night Safety Light is a quality lighting aid that uses a low energy bulb, allowing the unit to be safely left on during the hours of darkness without excessive cost. The dusk till dawn sensor detects changes in the levels of light turning on when they become too low and turning back off when suitable light level is detected.

Operation

Plug the unit upright into a suitable socket where it will sufficiently illuminate the chosen area.

Once the socket is activated, the Automatic LED Night Safety Light will react to the light level accordingly. To turn off the light, simply switch off the socket and unplug the unit.

Caution

- Always plug the light in an upright position.
- Do not cover or block with furniture.
- Keep away from children.
- For indoor use only.
