

Glow-in-Dark Powerbank Torch

Luminous green 2-in-1 emergency device

Product Code: OT01485

Introduction

The lightweight 2-in-1 device is the perfect emergency accessory for situations that see an individual without power or light. The powerbank element has a 2,000mAh capacity via the 3.7v 18650 Li-ion battery inside and can charge devices via both the Type A and Type C ports.

The torch element features 3 modes of high, low and strobe, with the torch head also glowing in the dark for ease of visibility. The bright green body also boosts visibility meaning the unit can be easily located even in low light conditions.

Contents

1 x Powerbank torch
1 x Charging cable

Operation

To use the powerbank function, simply insert your Type A or Type C charging cable into the relevant port on the bottom of the unit and connect to your device. Ensure your device and cable meet the output spec below. The 2,000 mAh capacity should ensure approximately 1 hour of charge depending on the device it connects to.

To use the torch function, press the button and cycle through the 3 modes as needed. The lumens and approximate lifetime of each mode (based on being constantly on) are below:

High - 100 lumens, 1.5hrs
Low - 50 lumens, 2.5hrs
Strobe - 100 lumens, 2hrs

Charging the Unit

It is recommended you keep the unit fully charged in case of emergency requirement. Using the cable provided, or a cable that meets the input spec below, insert the Type C end into the Type C port of the unit and connect the USB end into a relevant power source or adapter. During charge the LED will flash green and red, turning solid green when fully charged. A full charge should take 3-4 hours depending on your power source. The unit is supplied with >50% charge.

Input: Type C, 1.5V, 1A
Output: Type A and Type C, 5V, 1A

WARNING

Do not look directly into light source, do not point directly into the face of others.
